

## Unique bridges selection for ThaMa Double syringes

Introducing the new way of working with the automatic double syringe. Our revolutionary unique **bridges**, will improve your vaccination experience, and offer you the best solution for double vaccination.

### Benefits:

- Use the double syringe to inject with one needle or two.
- Choose the distance between the needles.
- Inject horizontally, vertically or on the side.
- Easy to use, safe, and cost-effective
- Precise & Accurate delivery for better yields
- Only 1 person is required for injecting 2 vaccines. You will save time, and reduce manpower
- Ergonomically designed for Maximum comfort
- Durable & easy to maintain

For over 60 years ThaMa-Vet developed a wide range of innovative self-refilling veterinary syringes designed for mass vaccination.
